### **DETAILED ACTION**

Claims 1-27 are pending.

#### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I, claim(s) 1-11, drawn to a method of making a core/shell nanoparticle composition.**

**Group II, claim(s) 12-25, drawn to core/shell nanoparticle composition.**

**Examiner notes, claims 26 and 27 recite non-statutory subject matter as written (see MPEP 2173.05(q) for more information). Applicant is advised to rewrite the claims in a form that places them in a single statutory category. Upon rewriting of the claims Examiner will place the claims in an elected group or a new group as appropriate.**

As set forth in Rule 13.1 of the Patent Cooperation Treaty (PCT), "the international application shall relate to one invention only or to a group of inventions." Moreover, as stated in Rule 13.2 PCT, Unity of Invention is satisfied "where a group of

inventions is claimed in one and the same international application, the requirement of unity referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features."

2. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole makes over the prior art so linked as to form a single general inventive concept.

"nanoscale (< 100 nm) core/shell nanoparticles with an inorganic core and a metal shell" does not present a contribution over the prior art, as it is disclosed, and therefore anticipated, by Zhou et al. in Physical Review B, Volume 50, Number 16, pages 12,052 to 12,056. Zhou et al. discloses the synthesis of gold-coated nanoparticles with nonmetallic cores (pg. 12052, col. 1, lines 18-20) with diameters of about 5 nanometers (pg. 12052, col. 2, lines 15-16). As a result, as currently presented, claim 12 does not possess a special technical feature and, as such, unity between the above Groups is broken.

3. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP

§ 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to Tanya Harkins on October 14, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.
